BIOTAL SC Farm Pack

part of **LALLEMAND**

All farms and forages are different and cows face different challenges, so there is a Biototal SC live yeast farm pack formulated to meet different situations. Use the table below to select the right product for you:

BIOTAL SC **toxisorb**

A combined live yeast and mycotoxin remediation product for use in diets where mycotoxin problems are suspected. Improves rumen function and helps reduce absorption of mycotoxins.

BIOTAL SC **gold**

The live yeast product for farmers looking to maintain cell count and rumen health. Adding organic selenium and zinc helps maintain udder health, reduce cell count, increase hoof strength and reduce the incidence of retained cleansings.

BIOTAL SC **emerald**

Specially formulated for use at grazing, the combination of live yeast and plant extract improves rumen health and ensures the best use of the protein in grass. Also includes organic selenium and zinc to help maintain dairy health.

BIOTAL SC **original**

Approved by Organic Farmers and Growers for use in organic dairy systems to maintain rumen health and productivity.

BIOTAL SC **platinum**

The live yeast product formulated for rumen health with higher levels of organic selenium and zinc to use where there are problems of high cell count and udder health. Suitable for diets including forage maize and wholecrop silage where selenium content can be low.
